PRIMARY EXAMINER

REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

The prior arts fail to teach or fairly suggest a flash memory device that can detect short circuits in local and global bit lines. The method includes the steps of "***programming even columns of addresses*** of a memory array to a first logic state", "***programming odd columns of addresses*** of a memory array to an ***opposite*** logic state", "***monitoring logic states*** in global bit lines", "and ***simultaneously determining the short circuits in local and global bit lines*** in response to a pattern of logic states in the global bit lines". The advantage further include the steps of "selectively ***coupling odd local bit lines to odd global bit lines***" and "selectively ***coupling even local bit lines to even global bit lines***" during testing.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Viet Q. Nguyen whose telephone number is (571) 272-1788. The examiner can normally be reached on 7am-6pm (EST).
